Art Unit: 1761

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 15, 2004 has been entered.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Claims 1-10, 12-18, 22-32, 34-40, 45-47 and 50 are rejected under 35
 U.S.C. 102(b) as being anticipated by Bunczek et al (6,190,706), columns 3-6).

Bunczek et al is described in paragraph No. 6, Paper No. 8. The polyvinylacetate in Bunczek et al inherently functions to increase cohesion of the gum base since the PVAc is present in an amount as claimed by applicant and since the gum base in Bunczek et al has reduced adhesion to environmental surfaces.

Application/Control Number: 10/063,405

Art Unit: 1761

5. Claims 48 and 49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bunczek et al.

The amounts claimed in claims 48 and 49 are merely preferred (spec., page 3), and preferred limitations, without more, are not critical (In re Rauch, 156 USPQ 502). Further, finding the optimum amount of each component in the gum composition would require nothing more than routine experimentation by one reasonably skilled in this art.

6. Claims 1-10, 12-18, 22-32, 34-40 and 45-51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mansukhani et al (5,601,858, columns 2-6).

Mansukhani et al is described in paragraph No. 4, Paper No. 8. The maximum amount of PVAc used in Mansukhani et al is 10% by weight. In the absence of unexpected results, there is no patentable distinction between said 10% amount and applicant's claimed amount of greater than 10%, especially since Mansukhani et al also achieves applicant's desired results, viz. a non-stick chewing gum which is easily removed from a variety of surfaces. With regard to claims 47-50, applicant is referred to paragraph No. 5 above.

Applicant's arguments filed December 15, 2004 have been fully considered but they are not persuasive. Despite applicant's contrary belief, increased cohesion of the gum base is naturally achieved in Mansukhani et al as a result of the presence of PVAc in an amount substantially equivalent to applicant's claimed amount and since the gum base in Mansukhani et al is a non-stick gum base. Although Mansukhani et al includes emulsifiers or surfactants to assist in the non-stick character of the gum base, as applicant suggests, applicant also includes emulsifiers in the claimed gum base.

Application/Control Number: 10/063,405

Art Unit: 1761

Applicant's comments with regard to Bunczek et al are refuted by the discussion in paragraph No. 4 above and since Bunczek et al clearly discloses applicant's claimed amount of ultra high MW PVAc (column 3, lines 45-49 and column 3, line 66 to column 4, line 3).

- 8. Claims 48 and 51 are objected to because of the following informalities: In claim 48, "plasticizer" is misspelled. In claim 51, "emulsifier" is misspelled. Appropriate correction is required.
- 9. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b).

 Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Application/Control Number: 10/063,405

Art Unit: 1761

10. Any inquiry concerning this communication from the examiner should be directed to Arthur L. Corbin whose telephone number is (571) 272-1399. The examiner can generally be reached on Monday--Friday from 10:30 to 8:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on (571) 272-1398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
